SUMMARY

Motivated and detail-oriented Python Developer with a strong foundation in Python, Django, MySQL, HTML, CSS, and JavaScript. Skilled in developing scalable web applications, building backend solutions, and designing efficient database-driven applications. Familiar with REST APIs, Git, and object-oriented programming principles. A quick learner with strong analytical and problem-solving abilities, eager to contribute to a collaborative development team while continuously enhancing technical expertise.

TECHNICAL SKILLS

Programming Languages:	Python, JavaScript
Frameworks:	Django, Bootstrap
Web Technologies:	HTML5, CSS3
API Development:	REST APIs
Database:	MySQL
Version Control:	Git, GitHub
Tools:	Visual Studio Code, Postman
Core Concepts:	Object-Oriented Programming (OOP), CRUD Operations, MVT Architecture

AI-POWERED EXAM & INTERVIEW PROCTORING SYSTEM

Technologies: Python, Django, HTML, CSS, JavaScript, Bootstrap, OpenCV, MediaPipe, YOLOv8, SQLite

- Developed an AI-powered online Exam & Interview Proctoring System using Python and Django.
- Implemented real-time face detection, eye gaze tracking, mobile phone detection, multiple-person detection, and browser activity monitoring using OpenCV, MediaPipe, and YOLOv8.
- Built a real-time alert system with warning messages, sound notifications, violation logging, screenshots, and automated proctoring reports.
- Designed role-based authentication, an admin dashboard, interview management, and a responsive user interface for students, interviewers, and administrators.
- Used Git and GitHub for version control and project management.

BANK MANAGEMENT SYSTEM

Technologies: Python, Tkinter, JSON, OOP

Developed a desktop-based Bank Management System using Python and Tkinter with secure user registration and login functionality. Implemented account creation, deposit, withdrawal, fund transfer, balance inquiry, interest calculation, and mini statement features. Utilized JSON for data storage and applied Object-Oriented Programming (OOP) principles to build a modular and maintainable application.

KEY FEATURES:

- | | |
|--|-------------------------------------|
| • User Registration & Login | • Mini Statement |
| • Account Creation (Savings, Fixed, Current) | • Interest Calculation |
| • Deposit & Withdrawal | • JSON-based Data Storage |
| • Fund Transfer | • Tkinter GUI |
| • Balance Inquiry | • Object-Oriented Programming (OOP) |

APPLESTORE – E-COMMERCE WEB APPLICATION

Technologies: HTML5, CSS3, JavaScript, Bootstrap, LocalStorage

- Developed a responsive Apple Store e-commerce web application using HTML, CSS, and JavaScript.
- Implemented product browsing, search, category filtering, shopping cart, and order management functionalities.
- Built an Admin Panel to add, edit, and delete products and brands with data persistence using LocalStorage.
- Integrated multiple payment options, QR code generation, PDF invoice download using jsPDF, and a responsive user interface.

Live Demo: https://samtheodore.github.io/Apple_Store/

KR ELECTRICIAN – Billing & Management Web Application (Client Project)

Technologies: HTML5, CSS3, JavaScript, Bootstrap, LocalStorage

- Developed a web-based billing and management application for an electrician service business using HTML, CSS, and JavaScript.
- Implemented dynamic bill generation with customer details, service calculations, and automated total amount computation.
- Integrated WhatsApp bill sharing, QR code generation for digital payments, and PDF/Excel bill export functionality.
- Designed a responsive and user-friendly interface to simplify billing operations and improve business efficiency.

Live Demo: <https://samtheodore.github.io/KR-ELECTRICIAN/>

JEEVI GLOSSY GLOW – Beauty Service Website (Client Project)

Technologies: HTML5, CSS3, JavaScript, Bootstrap

- Developed a fully responsive beauty service website for a client using HTML, CSS, and JavaScript.
- Designed an attractive and user-friendly interface to showcase makeup, mehendi, hair styling, and saree draping services.
- Integrated business branding, contact information, and social media links to improve customer engagement.
- Optimized the website for desktop and mobile devices and deployed it using GitHub Pages.
